

Aquami Monoblock heat pump

AQM100X1 [R14]

Device features

Environmentally friendly refrigerant R32

Efficient heating

Energy efficiency class at 35°C

Energy efficiency class at 55°C A++

Maximum COP 4,95

Operating range down to -25°C

Supply water temperature of 65°C

Integrated USB port for updates

Energy

Smart Grid

Twin rotary

Integrated electric heater

Outdoor unit drip tray heater

Compressor crankcase heater

Easy installation and maintenance

Silent

Wired controller Wi-Fi module

Configurable daily schedules

Configurable weekly schedules

Vacation mode

Notes: DHW – Domestic hot water, LWT – Leaving water temperature

The sound pressure level is measured 1m in front of the unit and (1+H)/2m (where H is the height of the unit) above the floor in semi-anechoic room. During on-site operation sound pressure levels can be higher as a result of ambient noise. Sound pressure level and sound power level reflect the maximum value tested under three conditions specified respectively in notes A7W35, ΔT=5; A7W45, ΔT=5; A7W55 ΔT=8; relative humidity 85%. The figures specified above refer to the following standards: EN14511; EN14825; EN50564; EN12102; (EU) Np. 811/2013; (EU) No. 813/2013; Journal of Laws 2014 / C 207/02: 2014.

The residual current circuit breaker used to protect the electrical circuit of the appliance shall be selected in view of the electrical regulations in force, assuming that the rated residual current is not greater than l\(\text{Lm}\): 30mA

*The above values apply to supply cables with a maximum length of 20mb. If this value is exceeded, an electrical designer should be consulted.
